SOPHISTA™ has both hydrophilic and oleophilic properties.

Molecular structure of EVOH

Hydrophilic (Water friendly)
Hydrophobic (Oil friendly)

These two groups are mixed together appropriately to form an infinite chain.

Point 1  
Close fitting

Point 2  
High level of dispersibility

Point 3  
Gentle on the skin

Serum dispersed efficiently onto the skin

Measurnent method: Nonwoven fabric was impregnated with serum, placed on filter paper, and the amount of liquid released was measured.

Dispersion of serum

Serum effectively dispersed onto the skin
